PROFILE

DevOps Engineer and open-source community builder with 3+ years of hands-on experience in observability, Kubernetes, and cloud-native infrastructure, and a proven record of teaching it to others. Docker Captain (2026, ~220 worldwide) and Grafana Champion (2026, ~110 worldwide). Organizer of Grafana & Friends Ahmedabad and CNCF community chapters. Built certification labs used by 100K+ learners at KodeKloud and represented the team at KubeCon + CloudNativeCon India 2024. Writes a technical blog on observability, Kubernetes, and cloud cost, and contributes to open source including the Hindi localization of eBPF.io. Deep production experience with OpenTelemetry, Prometheus, and the Grafana LGTM stack.

HONORS & RECOGNITION

- **Docker Captain (2026).** Selected by Docker, Inc. for container and Kubernetes expertise and sustained community contribution. One of ~220 members globally.
- **Grafana Champion (2026).** Grafana Labs' invitation-only program for contributors advancing the observability community. One of ~110 worldwide.
- **KubeCon + CloudNativeCon India 2024, Delhi.** Represented KodeKloud at the inaugural edition, engaging the CNCF community across observability and platform-engineering tracks.

CORE SKILLS

- **Observability:** OpenTelemetry, Prometheus, Grafana LGTM stack (Loki, Grafana, Tempo, Mimir), Netdata, New Relic, Datadog
- **Containers & Orchestration:** Kubernetes, Docker, Helm, Argo CD (GitOps)
- **Cloud & IaC:** AWS, Azure, GCP, Oracle Cloud (OCI), Terraform, Ansible, Azure Bicep
- **CI/CD & Scripting:** GitHub Actions, Jenkins, GitLab CI, Azure DevOps, Linux, Bash, Python
- **Security & Compliance:** SIEM, DevSecOps, SOC 1 / SOC 2 and ISO readiness, secure CI/CD, incident management and on-call
- **Developer Relations:** Technical writing and blogging, workshops and live training, meetup organizing, conference representation, demo and lab creation, developer support on Discord, forums, and GitHub

PROFESSIONAL EXPERIENCE

DevOps Engineer · Oro, Ahmedabad, India

Jun 2025 – Present

- Operate production Kubernetes workloads with Helm and GitOps via Argo CD, with CI/CD on GitHub Actions and IaC with Terraform.
- Additionally own the complete cloud infrastructure of Tenmark Capital, Oro's NBFC arm, running regulated financial-services workloads alongside the core Oro platform.
- Saved the company \$150K+ within the first 6 months of joining by cutting \$38K in cloud spend through cost optimization and helping secure \$100K in cloud credits.
- Set up the Grafana LGTM stack (Loki, Grafana, Tempo, Mimir) with OpenTelemetry from the ground up, instrumenting services, building dashboards, and tuning the platform for production reliability.
- Driving the migration of a monolithic application to microservices, moving workloads from bare EC2 instances to Kubernetes.
- Own incident management and participate in the on-call rotation, running response, root-cause analysis, and postmortems to improve MTTR.
- Implemented SIEM tooling and security hardening, and drive compliance readiness for SOC 1, SOC 2, and ISO standards.

- Drove a 59% AWS cost reduction through FinOps practices and led a zero-downtime AWS to Oracle Cloud migration of QA and production workloads under a hard deadline, saving ~\$8,000 per month.
- Built end-to-end CI/CD pipelines across 3 Kubernetes clusters using Jenkins and Argo CD, bringing release time down to ~10 minutes and cutting manual deployments by 25%.
- Integrated a Grafana and Netdata observability stack, reducing system downtime by 80% and improving MTTD and MTTR.
- Implemented DevSecOps controls for ISO and SOC Type 1 readiness.

- Designed and published hands-on Azure certification labs (AZ-900, AZ-104, AZ-204, AZ-400) and multi-cloud environments on AWS, Azure, and GCP for 100K+ learners, improving course completion rates by 14%.
- Automated lab provisioning with Terraform, Ansible, Azure Bicep, and Bash, cutting setup time by 38%. Wrote automation to mitigate Docker Hub rate-limit failures for students.
- Supported 1,000+ learner queries via Discord and community forums with frontline developer support, troubleshooting, and best-practices guidance.

- Managed cloud-agnostic deployments across Azure, AWS, GCP, Linode, DigitalOcean, and Contabo for 15+ client projects with zero critical downtime.
- Built CI/CD pipelines on Jenkins, GitHub Actions, GitLab CI, and Azure DevOps, and automated provisioning and monitoring with Docker, Terraform, Ansible, and Grafana, reducing manual work by 25%.
- Ran an internal TechTalk on Kubernetes. Started as a Laravel/PHP developer before transitioning into DevOps.

COMMUNITY, CONTENT & SPEAKING

- **Grafana & Friends Ahmedabad.** Organizer and host of the quarterly chapter meetup focused on observability, OpenTelemetry, and the Grafana LGTM stack. Run hands-on workshops on Prometheus and LGTM.
- **CNCF Chapters, Gandhinagar & Ahmedabad.** Core team member organizing Kubernetes and cloud-native meetups and workshops.
- **Technical Blog.** Regular writing on Kubernetes certifications, observability, CNCF contribution, cloud cost, and Linux.
- **Linux Foundation Education Partner.** Provide the community year-round discounted access to CKA, CKAD, CKS, and KCNA certifications.

OPEN SOURCE CONTRIBUTIONS

- **eBPF.io.** Led Hindi localization of the website, making advanced kernel and observability concepts accessible to Hindi-speaking engineers.
- **Helm.** Contributed to the Hindi translation of Helm's official documentation.
- **Meshery.** Contributed UI/UX design enhancements to the Meshery dashboard.

CERTIFICATIONS

- KCNA: Kubernetes and Cloud Native Associate, The Linux Foundation
- Microsoft Certified: Azure Administrator Associate (AZ-104), renewed 3x, valid through 2027
- Microsoft Certified: Azure Fundamentals (AZ-900), GitHub Foundations, Postman API Fundamentals Student Expert, LFC101 Inclusive Speaker Orientation

EDUCATION

B.E., Computer Engineering, Parul University

2023

Diploma, Computer Engineering, Gujarat Technological University

2020
